

Follow the 4 easy steps . . .

1

Select & book

For courses published on the calendar with fixed dates and locations

- > Select your course
- > Complete and return the booking form

To arrange a course flexible to your timescale and/or at your premises

- > Contact the Industry Distributor Training team on GB-Industry-Training@gb.schneider-electric.com or call us on 0870 608 8 608
- > We can discuss your training requirements and advise suitably

2

Confirmation & instructions

We will confirm your booking by email with attendance details

Industry awareness courses

- > See step 4

Essential solutions courses & collaborative control system courses

- > See step 3

Pick and mix advanced technical courses

A range of advanced technical courses tailored to suit your needs. A member of our Automation training team will contact you to discuss your requirements, including course content and payment options.

3

Pre-course evaluation

Essential solutions course & collaborative control system courses

A pre-course evaluation will be sent to you with instructions by email and must be returned at least 10 working days prior to attending the course. This allows us to ensure that the course is right for you, and ensures all candidates have a similar level of knowledge to allow a better learning experience.

Important note: The pre-course evaluation is a requirement of the rebate structure described in the distributor policy. If you do not demonstrate the required level of knowledge and skills for your chosen course, Schneider Electric reserve the right to stop your application for that course, and will offer you a more suitable course.

4

Attend course

All courses

- > You are ready to attend the course, simply follow the details provided in your booking confirmation email.

Important note: At the end of the course you will be required to complete a closed book multiple choice assessment. If you fail the post-course assessment you will not be eligible for a rebate payout as described under the terms of the distributor policy.
